

Groove Source Copyright/Licensing Agreement.

When you purchase one of our sample libraries you are NOT obtaining OWNERSHIP of the sounds in the library. Ownership remains with GROOVE SOURCE. You are purchasing a LICENCE to use the sounds within your musical compositions, whether or not your compositions are released commercially. Copying, duplication, lending or re-selling of this product or its contents in whole or part are strictly prohibited. Once purchased your license is NONTRANSFERABLE which means that the license is authorised only to the original purchaser. You are not permitted in ANY way to share the purchased sample library with others.

The Digital Content (as defined in our terms and conditions) remain the property of our licensors and/or Groove Source Limited (collectively, “Licensor”) and are licensed to you on the basis of our terms and conditions as the original end-user (“Licensee”), for use subject to those provisions below which apply to the applicable type of Digital Content. All rights not expressly granted herein are reserved exclusively by Licensor.

Licensor or Groove Source Limited may revoke a licence granted to you in respect of Digital Content if you breach any of the below licence terms or our terms and conditions.

Once you have purchased one of our sound libraries you have a single user license which permits you to use sounds from that library with combination with others sounds in your own music productions (which include soundtracks such as films, video productions, radio/TV programs or commercials, computer games and multimedia presentations, public performances and other reasonable musical purposes within musical compositions). You may release such productions commercially without payment of any further royalties or fees for such usage.

You MAY NOT use the sounds and MIDI files in isolation as sound effects (i.e. a sequence of musical events) or within any competitive products that are sold or relicensed to multiple third parties. For example you are not authorised to create another sound library with any of the sounds from our products. Doing so will infringe copyright law and you will be liable for prosecution under the copy write design and patents act 1988.
